For an optimal handling with the attachment we recommend a fork lift truck being equipped with independent side shift (integrated or hook-on)
In this case a third hydraulic function on your FLT will be necessary or an additional solenoid valve (add-on price see accessories).

Specification:

With the KAUP Drum Tipping Device T130F

several upright standing cylindrical steel barrels can be lifted at the same time, be transported recumbent and be put down again upright. For the safe admission and the unthreatened transport the clamping jaws of the drum tipping device are elastic-occupied.

Qualities:

- Very good price-achievement relation
- Very good visibility conditions
- Tilting corner 90° forwards
- Independent sideshift optionally
