Forks are not included.

Forks see model T180.

To choose the right fork length please consider dimension „V“ of the pusher.

Multi-fork pusher T141S/180 available upon request.

Specification:

KAUP Pusher T141S and Pusher with pallet

retainer T142S are part of the KAUP Push-Pull range of products.

Contrary to palletless loading, using this attachment the load is either pushed completely off the wooden/plastic pallet (T141S) or separated from the wooden/plastic pallet (T142S).

Pushers are mounted

directly on to the fork carriage between the existing forks and can be combined with other KAUP attachments.

Qualities:

- Solid construction
- Good visibility conditions through the attachment
- Good residual capacity
- Self supporting scissor system
- Different lengths of forks useable
- Multi-fork pushers available upon request
- Combination with other attachments - for example sideshifters - possible
