2/3T149Z suitable to attach clamps and multi pallet handlers.
The capacities are related to the extended pantograph
Available with sideshift function upon request.
Max. distance from fork tip to mast = V + C + thickness of FLT carriage + fork lenght.
Other fork carriage widths available upon request.

# Pantograph T149 / T149Z

## Specification:

The KAUP Pantograph type T149/T149Z is

put into operation whenever Telescopic Forks or Reach Forks cannot be

used due to the thickness of the forks. The knife forks of this

attachment can pick up loads with very little bottom clearance and

stacked double deep for transportation. Additionally the Pantograph

T149/T149Z can be combined with a whole range of other KAUP attachments -

for example Bale Clamps and Roll Clamps.

## Qualities:

- Original forks useable
- Solid design
- Sideshift optionally
