Higher capacities, other construction widths and longer forks available upon request.
Secured by safety pins behind the fork shank as standard.

Cross Girder T180LA

Specification:

The KAUP Cross Girder T180LA is put on directly on the available forks. It is used to transport especially long loads like pipes or metal sheets solidly.

Qualities:

- Robust construction
- An easy assembly
- Original forks of the stacker usable
- Optionally: ISO suspension instead of fork shoes
