Ram length to be at least 2/3 of roll length
 Other ISO-classes than indicated are available upon request.

Specification:

Carpet rolls with a small inner diameter

can be easily transported with a KAUP Carpet Carrying Ram T185T. The

length of the long thin ram should be at least $\frac{2}{3}$ of the length of the

carpet to be transported. This means that a ram with a length of 3.500

mm can transport a carpet with a length of 5.000 mm.

Qualities:

- Manufactured from steel with high tensile and yield strength
- Solid design
- Mounted directly on to the fork carriage
- Optionally to slip-on forklift truck forks
- Variation for handling Big Bags available
