	mm	mm	kg	人民币
T198G1 ¹⁾	1.700	2.000	220	On request
T198FG1 ²⁾	1.700	2.000	320	On request

Fork pockets with other dimensions available upon request

- 1) Snow Plough Blade T198G1 with polyurethane ridge
- 2) Snow Plough Blade T198FG1 with spring flaps (steel)

Specification:

Snow clearing is one of the many various applications of a forklift truck. During snow clearing "invisible" obstructions such as kerbs, manhole covers, gate holders can be expected. Therefore the KAUP Snow Plough Blade T198FG1 is fitted with flexible bottom flaps especially to protect the fork carriage and mast.

Qualities:

- Strong, strengthened construction
- Exchangable Polyurethan ridge serially (T198G1)
- Four spring loaded flaps as option (T198FG1)
- With mechanical swivel to clear right-left serially
