Single arm drive = H, dual arm drive = 2H. With single arm drive only drums in vertical position can be handled.

The arms are coated with Remagrip (see coatings in the pricelist).

Drum Tipping arms are also available as slip-on version for KAUP Fork Clamps (see models T106AH and T106A-2H).

Also available with sideshift, model T416H (2H) on request

Tipping Clamps for specific purpose (garbage bins, containers) and higher capacities available upon request.

Available with arms for plastic drums upon request.

Specification:

With the KAUP Drum Tipping Clamp T406

H/-2H it is possible that cylindrical steel drums, however, also other

containers can be dumped ahead. Moreover, it is feasible with the

T406-2H-version of this attachment to take up recumbent drums and to

bring them in a vertical position. For it clamp arms are serially

vulcanised with rubber.

Qualities:

- Good visibility conditions
- Good residual capacity
- Robust construction
- Up to 180° hydraulically tiltable
