1) Transport of europallets lengthwise not possible.
CofG and weight measurements do not take the cheek plates into account.
Fork carriage drawings, roller studs and chain anchors to be supplied by customer if necessary.
Not suitable for clamping between the forks.
with screw-on forks available upon request: T411BZIA
Load Backrest see model T179.
Also available without sideshift, model T401BZI

Fork Positioner, integrated T411 BZI

Specification:

The KAUP integrated Fork Positioner

T411BZI is a robust attachment with very large opening ranges suitable for exceptionally heavy duty operation - ideal for uneven surfaces. The construction gives an optimal view to the fork tips. The residual capacity is, due to the integration in the mast of the forklift truck, higher than the T411BZ range.

Qualities:

- Very large opening ranges
- Valve block sideshift - dependent on opening range - serially
- Screw-on forks optional
